

FOR IMMEDIATE RELEASE

Modalis Infrastructure Partners & Lopez and White Partnership launch airportQM

June 6, 2019

Vancouver, Canada and London, United Kingdom

Modalis Infrastructure Partners and Lopez and White Partnership, building on their recent collaboration on projects in Singapore and Algeria, are delighted to announce the launch of airportQM by Modalis, providing benchmark operations and technical advisory services to airports worldwide.

The new airportQM platform brings together a network of 100+ highly experienced airport and aviation experts, providing specialist advisory services to the sector in quality and safety management, regulatory compliance, industry best practice, Operational Readiness and Airport Transfer (ORAT) and operational performance improvement.

Fernando Lopez-Calleja, based in London, has been appointed as the Managing Director of this new collaborative venture. Fernando brings a wealth of experience from his 15 years with London-Heathrow airport, where he served in various senior management capacities spanning airside operations, safety, integration and commissioning.

Modalis President & CEO Curtis Grad stated *“airportQM brings together many years of collective experience and expertise under a single umbrella, to provide a coordinated and comprehensive quality management approach to the sector.”*

“We look forward to bringing the experienced Modalis and Lopez and White teams together to assist our airport clients” Fernando Lopez-Calleja, airportQM Managing Director.

About Modalis & Lopez and White;

Modalis, a collective of five highly experienced managing partners and a network of subject-matter-specialists, specializes in strategic investment and professional advisory services including airport infrastructure privatization, investment, development and operations.

Lopez and White Partnership is an aviation consultancy offering benchmark operational and management solutions to airports, airlines, ground handlers and aviation suppliers. Our team combines decades of aviation experience based on UK, European and international key operational requirements and industry best practice.
